

GENERAL NOTE

For the URP version:

If there is a folder for URP inside the project:

1. Drag the package in the 'URP' folder into a new URP Unity project.
2. Please check your project's graphics and quality settings are set to 'Universal RP'.

For the Built-in version:

If there is a folder for Built-in inside the project:

1. Drag the package in the 'Builtin' folder into a new Built-in Unity project.
2. Please check your project's graphics and quality settings are set to 'None'.
3. Please install shadergraphs from the package manager.

Please join our discord server and write to us if you encounter a problem, would like to give feedback or more. We would be happy to help!
